ITIL® 4 Specialist: Sustainability in Digital & IT

Aligning sustainability objectives with Digital and IT strategies

As the environments in which we operate continue to evolve and present new challenges, organizations are considering the social and environmental impacts of their operations.

With the IT space projected to be responsible for up to 20% of global energy consumption by 2030*, business leaders and professionals are proactively looking for ways to tackle this challenge.

ITIL®

Future-proof with ITIL® 4

Introducing: ITIL® 4 Specialist: Sustainability in Digital & IT

As part of the ITIL 4 Extension Modules, a stream of the **globally recognized and adopted ITIL 4 framework**, this module has been developed to support IT professionals who are looking to understand the role IT and digitally enabled services have in relation to the environment, whilst exploring opportunities to positively impact it.

There are no formal prerequisites for this module. The relevant key concepts from the ITIL 4 framework will be covered as part of the syllabus, making it accessible to anyone interested in gaining critical skills and obtaining a formal certification in this area.

ITIL 4 Specialist: Sustainability in Digital & IT will enable professionals to:

- Understand how to use the ITIL guiding principles to **deliver value** by creating sustainable digitally enabled products and services
- Effectively address VUCA challenges through **sustainable strategies, procurement, products and practices.**
- Obtain a practical grounding in the **key principles of sustainability**
- Conduct a full cost benefit analysis identifying **potential risks and opportunities** using best practice guidance.

The module highlights key sustainability competencies and capabilities that service organizations should develop and build capacity within their teams to effectively address sustainability challenges.
